

FACULTÉ DES SCIENCES ET TECHNOLOGIES

(FST)

TROISIÈME ANNÉE

Rapport de TD -2

Cours: Systèmes

Étudiant : Johnfy Kerry LOUIS

Professeur : Ismael SAINT AMOUR

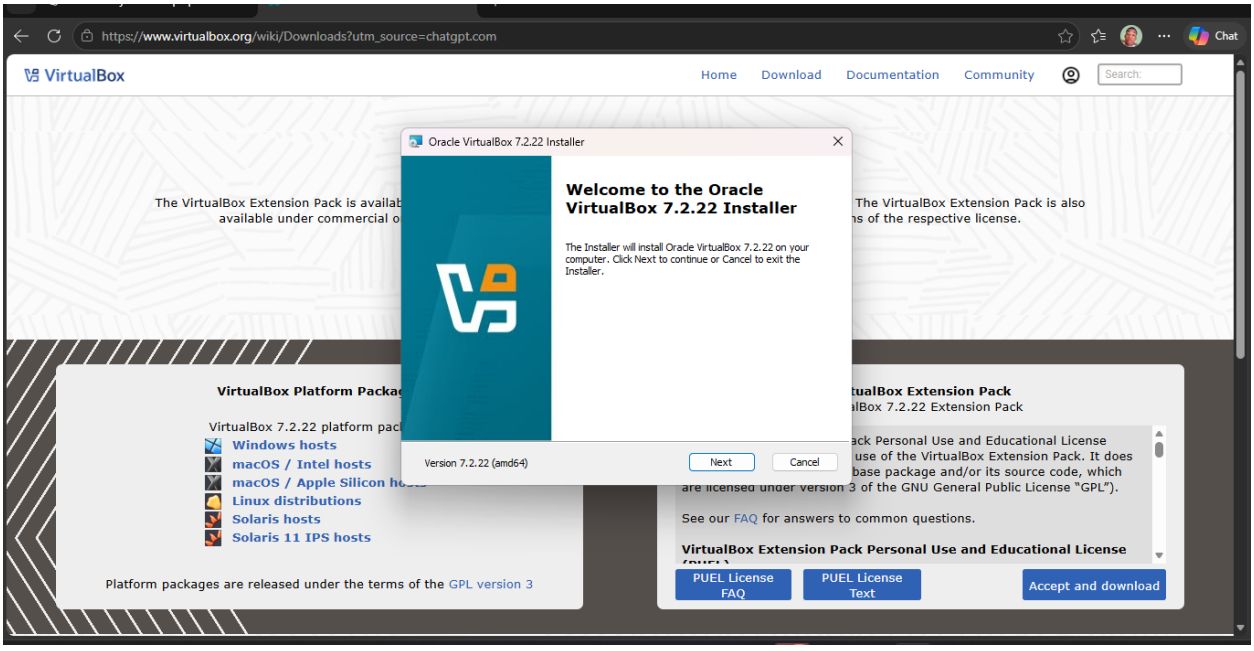

LE 29 OCTOBRE 2026

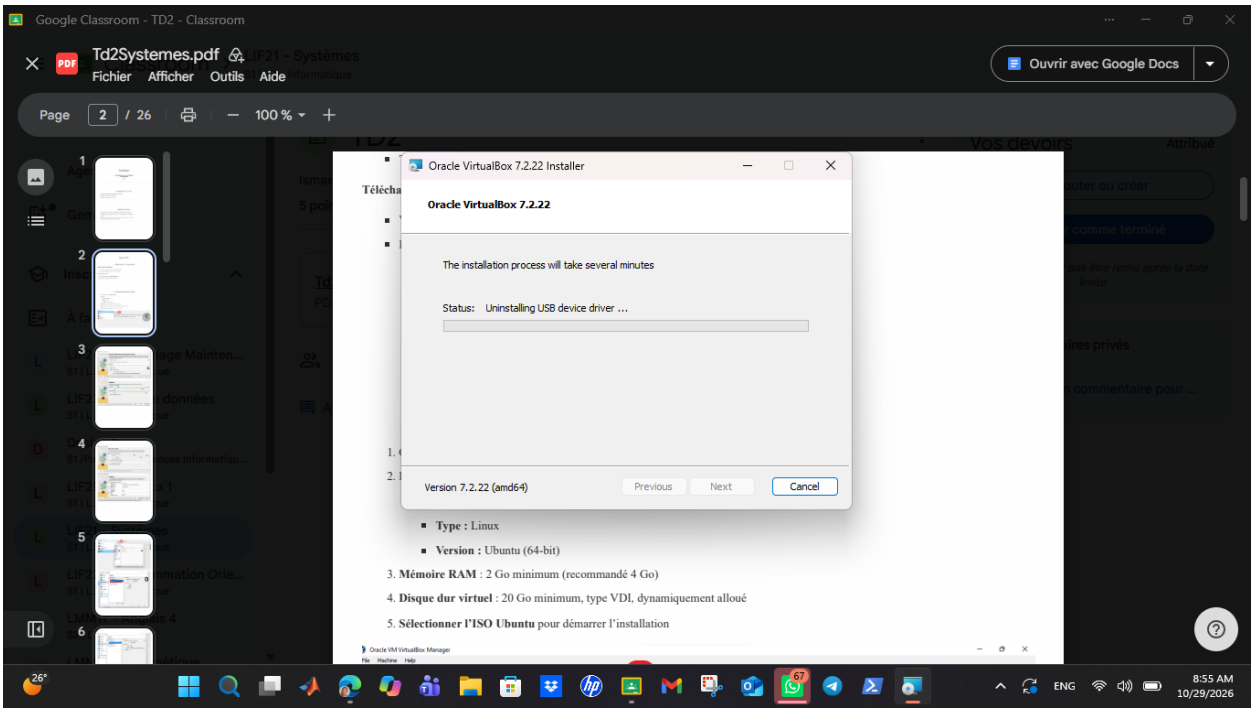

L’objectif de ce TD est de :

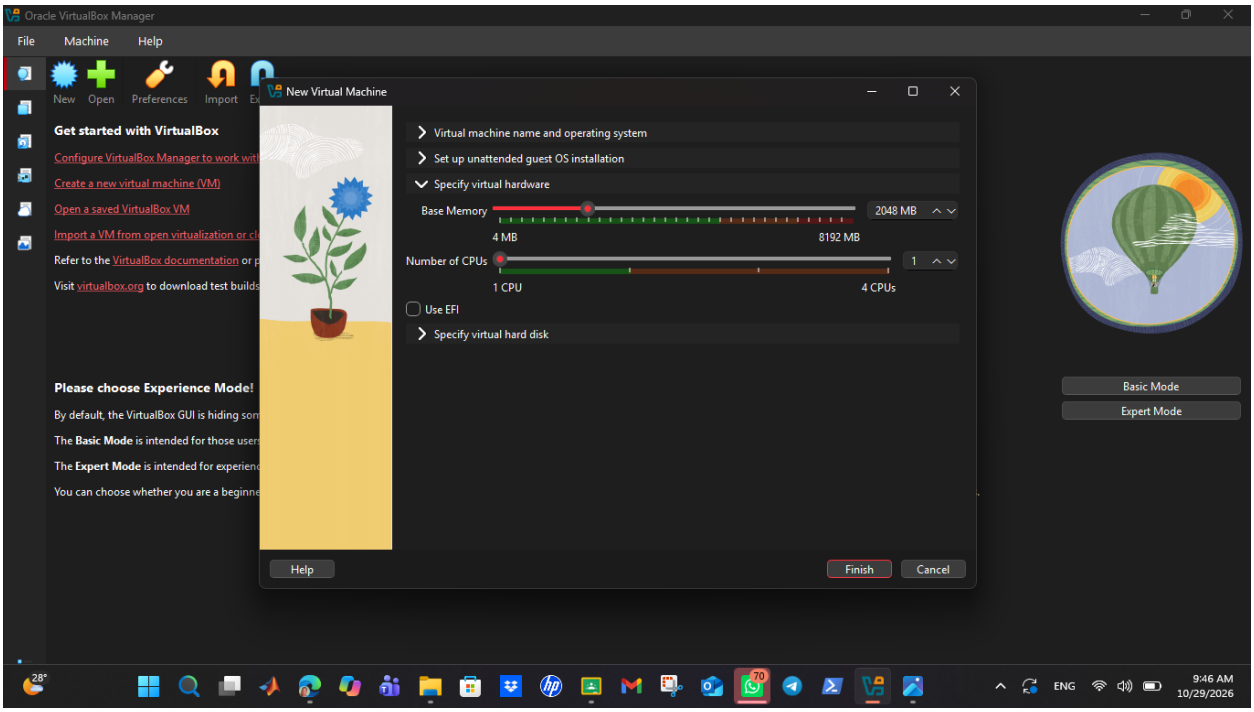

1. Installer et configurer Ubuntu dans une machine virtuelle.
2. Comprendre les concepts de virtualisation.
3. Pratiquer des commandes de base Linux.

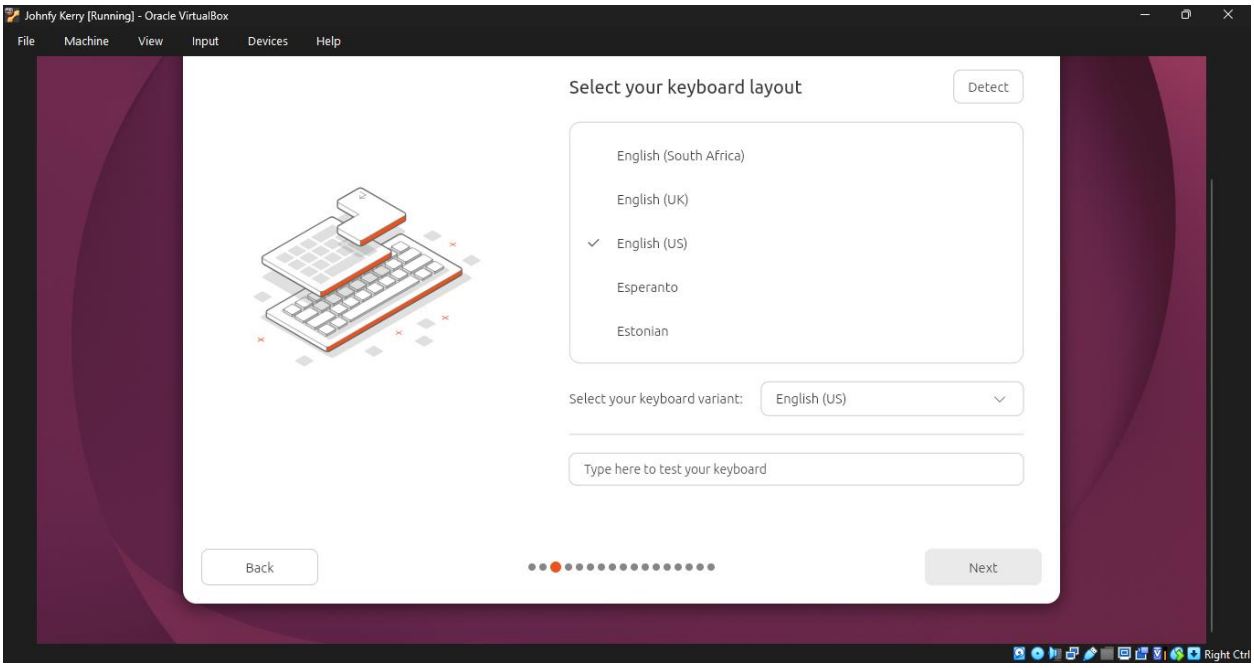

1. Introduction

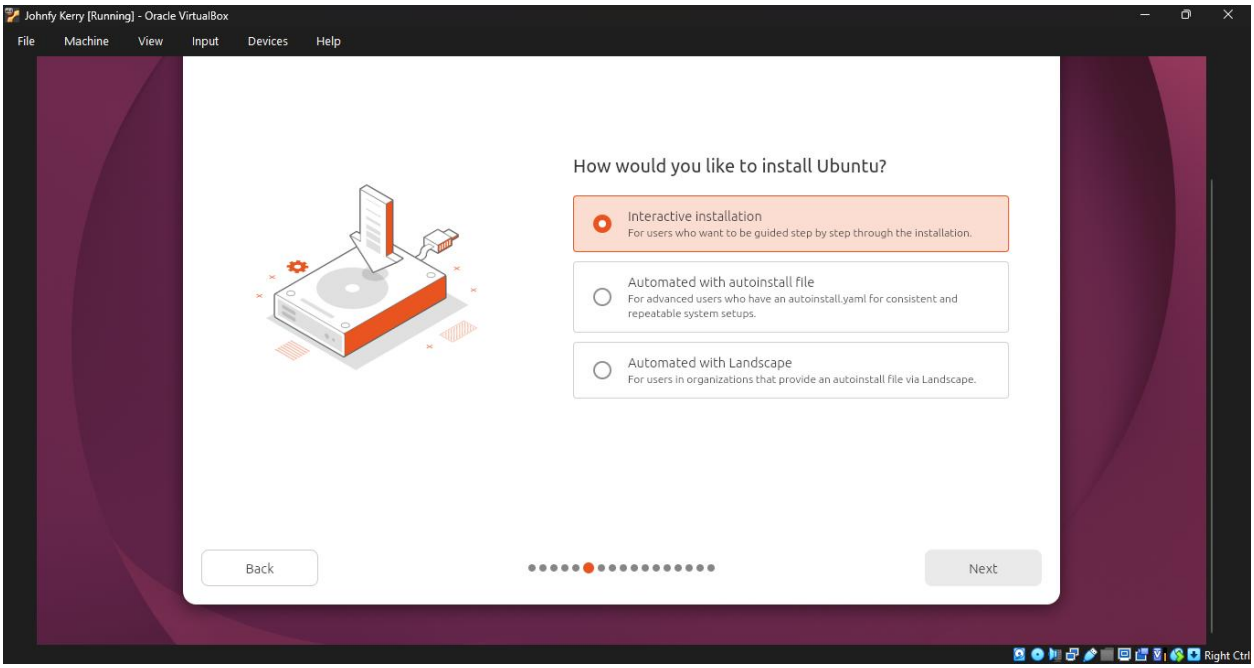

Ce TD consiste à découvrir la virtualisation à l’aide de VirtualBox et à préparer l’installation d’Ubuntu sur un ordinateur fonctionnant sous Windows.

2. Réalisation

J’ai installé Oracle VirtualBox 7.2.22 et créé une machine virtuelle nommée « Johnfy Kerry ». Je l’ai configurée avec 2 Go de RAM et un disque virtuel de 25 Go.

Au démarrage, une erreur liée au noyau Linux est apparue. Après quelques vérifications, j’ai réussi à accéder à l’installateur Ubuntu et à l’écran de configuration du clavier.

4. Conclusion

Ce TD m’a permis de découvrir VirtualBox et les premières étapes de la création d’une machine virtuelle. L’installation d’Ubuntu est en cours et doit être finalisée pour compléter les objectifs du travail.
